COMMITTEE ON FINANCE

WASHINGTON, DC 20510-6200

April 21, 2010

## Via Electronic Transmission

Charles Duarte  
Administrator  
Nevada Division of Health Care Financing and Policy  
State of Nevada  
4126 Technology Way  
Carson City, NV 89706

Dear Administrator Duarte:

In the United States, the federal and state governments spend roughly \$317 billion every year on the Medicaid program. As Ranking Member of the Senate Committee on Finance, I have an obligation to ensure that taxpayer dollars are appropriately spent on federal health care programs. Like the Medicare program, Medicaid suffers from systemic weaknesses that lead to fraud, waste, and abuse across the program, resulting in higher costs and less health care to those who are in need. The overutilization of prescription drugs, whether through drug abuse or outright fraud, plays a significant role in the rising cost of our healthcare system. The purpose of this letter is to request information regarding certain outliers in Nevada's Medicaid program and what steps Nevada takes to monitor rates of utilization.

In recent inquiries, I have asked the U.S. Department of Health and Human Services about physicians prescribing mental health drugs at astonishingly high rates. In addition to these concerns, a recent CNN report detailed the increasing abuse of OxyContin, Roxicodone, and Xanax. Specifically, the report described the role some pain management clinics and physicians play in the black market for these drugs. I write today to better ascertain how high rates of both mental health and pain medication utilization are affecting the Medicaid program, as well as how Nevada's rates compare to the national rates.

To that end, please provide charts that list of the top ten Medicaid prescribers of the following drugs for the years 2008 and 2009. For each prescriber, please provide his/her prescriber identifier, and the number of prescriptions written per drug per year, and the total amount billed to Medicaid per drug, separated for each year.

- Abilify;
- Geodon;
- Seroquel;
- Zyprexa;

- Risperdal;
- OxyContin;
- Roxicodone; and
- Xanax.

I thank you in advance for your cooperation and request that you provide the requested documents and written responses by no later than May 5, 2010. In your reply, please format information into a chart like the examples provided below. All formal correspondence should be sent electronically in PDF format to [Brian\\_Downey@finance-rep.senate.gov](mailto:Brian_Downey@finance-rep.senate.gov) or via facsimile to (202) 228-2131. Of course should you wish to discuss this matter further, please do not hesitate to contact Christopher Armstrong of my Committee staff at (202) 224-4515.

Sincerely,

Charles E. Grassley  
Ranking Member

The Honorable Charles E. Grassley  
Ranking Member  
United States Senate  
Committee on Finance  
Washington, DC 20510-6200

Dear Senator Grassley:

This letter is in response to your data request sent via electronic transmission to the Division of Health Care Financing and Policy (DHCFP), Nevada Medicaid for utilization and expenditures of specific psychoactive and controlled substance medications for calendar years 2008 and 2009.

Your letter, dated April 21st, 2010, requested limited data regarding several psychoactive and narcotic agents and the mechanisms the State of Nevada has taken to reduce inappropriate utilization of the medications. Nevada Medicaid believes that inappropriate utilization of medication is a serious matter that requires the utmost attention. Our goal is to decrease fraud, waste, and/or abuse that unnecessarily increase the expenditures to our programs and the well-being of our recipients. Our state is an underserved frontier/rural area that needs to assure access to health care for our recipients.

Nevada is providing the claims information as you requested. However, I must caution that use of the data outside of the appropriate context could lead to erroneous accusations of inappropriate utilization. This report has no safeguards to ensure it does not result in inappropriate conclusions. The report does not take into account any factors that influence utilization, such as, but not limited to: provider specialty, patient demographics, and accessibility to healthcare. I fear there may be misinterpretation of the data. Any data review must contain safeguards to ensure misleading conclusions will not be made. Nevada currently struggles with access to providers; a potential alienation of physicians could leave the State in a dire situation. To alleviate these concerns our Division is more than willing to work with anyone you assign to answer any questions regarding data or policy measures that have been taken to assure accurate interpretation is given.

The Nevada Medicaid program is a combination of Fee-for-Service (FFS) and Medicaid Managed Care. There are two Medicaid Managed Care companies for the State of Nevada; Health Plan of Nevada and Amerigroup. The Medicaid Managed Care plans are responsible for the TANF/CHAP eligible populations for our two largest counties; Washoe and Clark. The remainder of the eligibility groups including aged, blind and disabled from Washoe and Clark and all eligibility groups in rural Nevada are in the FFS program. It is important to note these

differences since the more expensive and medically fragile group of recipients are in the FFS program.

### General Utilization Controls

The State's claims processing system contains many edits to prevent erroneous medication usage or billing. Prospective (Concurrent) Drug Utilization Review (Pro-DUR) encompasses the detection, evaluation, and counseling components of pre-dispensing drug therapy screening. Every prescription undergoes a computerized ProDUR evaluation prior to dispensing of the medication. This integral part of the Nevada Medicaid Pharmacy Program alerts pharmacy providers to potential drug problems by reviewing claims for therapeutic appropriateness, reviewing medical history for recipients at risk of harmful outcome, and intervening and counseling when appropriate. Since the ProDUR system examines all pharmacy claims, it can detect inaccurate billing and inappropriate dosing before the recipient receives the service. The system is also programmed with many quantity edits to block overutilization. These edits address numerous products including: narcotics, narcotic/acetaminophen combinations, and sedative hypnotic agents. Nevada utilizes retrospective review to set quantity limits. Medicaid and the Drug Utilization Review Board, which is comprised of pharmacists and physicians, are responsible for this task. Not only are pharmacy claims subject to these quantity edits, but all outpatient physician claims must adhere to the same limits.

The Drug Utilization Review Board assists the State in determining clinical edits to mandate proper utilization via clinical system edits. These clinical edits place a "hard stop" on the service until the practitioner provides clinical justification for the prescription. Once the "hard edit" is activated the practitioner is mandated to complete a prior authorization before the service can be provided to the recipient. This committee also provides direct outreach to practitioners after review of utilization data.

### FFS Controlled Substances

In 2008, Nevada Medicaid FFS implemented a Pharmacy Lock-In Program. The program is managed by clinical staff which monitors recipients who demonstrate suspicious activity regarding controlled substance prescriptions. The goals of the DHCFP lock-in program are to provide continuity of care, avoid potentially harmful over utilization of prescription drugs, and ensure that only the most medically necessary care and services are provided. The State of Nevada's Board of Pharmacy adopted one of the first Narcotic Task Forces in the United States. The Board of Pharmacy captures every narcotic prescription dispensed in the State. Nevada Medicaid in conjunction with the Controlled Substance Task Force has access to this database. This gives access to utilization of all controlled substances regardless of payer source (including cash payments).

Once the State makes the decision to lock in a recipient to a specific pharmacy/physician, we notify not only the recipient, but physician(s) prescribing the narcotics. If a lock-in recipient attempts to get a controlled substance from another pharmacy, the claim will be denied. Only a pharmacy may request an override of the denial. Overrides will be considered for only one of

the following circumstances: the lock-in pharmacy is out of stock; the lock-in pharmacy is closed; or the recipient is out of town and cannot access the lock-in pharmacy.

The FFS Medicaid program has quantity edits and/or prior authorization controls on controlled substances. These include Fentanyl (i.e. duragesic patches), Long Acting Narcotics (i.e. Oxycontin), sedative hypnotics, and narcotic/acetaminophen combinations (i.e. Vicodin). Oxycontin © is considered a non-preferred drug on the Preferred Drug List. The quantity limitations are subject to a 90 day review. This is a more aggressive review period in comparison to other drug classes. In addition, for controlled substances, the state has a 90% refill tolerance policy. This policy means that a recipient must have used 90% or more of their current prescription, based on the medication instructions from the physician and/or pharmacist, to be eligible for a refill. All other drugs are at an 80% refill tolerance policy.

### Psychoactive Drugs

Effective April 15, 2009, a Nevada Medicaid policy went into effect requiring prior authorization (PA) for all psychoactive medications prescribed for the following recipients:

- All children ages 5 years and younger.
- Children/adolescents ages 6 through 17.

PA is required when more than one medication is prescribed from the same class, within the same 30-day period or when three or more psychotropic medications are prescribed (regardless of therapeutic class) within the same 30-day period.

The next scheduled Drug Utilization Review Board meeting will readdress the utilization of psychotropic medications for children/adolescents age 6-17. The Division's goal is to review last year's policy change outcomes and make any necessary adjustments to the current criteria. Our goal is to place more restrictive edits on the use of psychotropic medications in children; thereby, assuring medications are utilized for medical necessity.

The 26<sup>th</sup> Special Legislative Session (February 2010) modified our state regulation to allow the Division to manage the utilization of atypical/typical antipsychotic medications by placing them on the Preferred Drug List (PDL). On May 3, 2010, the Nevada Medicaid Pharmacy & Therapeutic Committee (P&T) added specific atypical antipsychotic medication to the PDL. The new PDL is effective July 1, 2010. The new atypical medications added to the PDL are; Clozapines, Fanapt ©, Geodon, Risperidone (all dosages), Seroquel© and Seroquel XR ©. Abilify© and Zyprexa© will be non-preferred medications. Xanax © is under the sedative hypnotics drug class and is considered non-preferred on the PDL.

Again, Nevada is willing to assist in continuing your effort to deter fraud and abuse in the Medicaid Program. Our Division wants to provide you with relevant data that can accurately identify appropriate and inappropriate utilization of medications.

May 27, 2010

Page 4

We request that any identified prescribers have the due process to represent the medical judgment utilized in their prescribing patterns. If you have any comments, concerns or questions please do not hesitate to contact me directly at (775) 684-3677.

Sincerely,

Charles Duarte  
Administrator

\* PRIMARY SOURCE IS NPI, IF NPI IS NOT AVAILABLE THEN MEDICAID PROVIDER NUMBER IS DISPLAYED  
 "Total RX" is an aggregate number which includes multiple NDC's for the listed product. These NDC's have multiple dosages and each one has a varying reimbursement per unit level. Individual claims can vary based upon the quantity the physician prescribed (i.e. days' supply). Due to each of these variables the average per script per provider will vary.

\* PRIMARY SOURCE IS NPI, IF NPI IS NOT AVAILABLE THEN MEDICAID PROVIDER NUMBER IS DISPLAYED  
 "Total RX" is an aggregate number which includes multiple NDC's for the listed product. These NDC's have multiple dosages and each one has a varying reimbursement per unit level. Individual claims can vary based upon the quantity the physician prescribed (i.e. days' supply). Due to each of these variables the average per script per provider will vary.

 "Total RX" is an aggregate number which includes multiple NDC's for the listed product. These NDC's have multiple dosages and each one has a varying reimbursement per unit level. Individual claims can vary based upon the quantity the physician prescribed (i.e. days' supply). Due to each of these variables the average per script per provider will vary.

\* PRIMARY SOURCE IS NPI, IF NPI IS NOT AVAILABLE THEN MEDICAID PROVIDER NUMBER IS DISPLAYED  
 "Total RX" is an aggregate number which includes multiple NDC's for the listed product. These NDC's have multiple dosages and each one has a varying reimbursement per unit level. Individual claims can vary based upon the quantity the physician prescribed (i.e. days' supply). Due to each of these variables the average per script per provider will vary.

\* PRIMARY SOURCE IS NPI, IF NPI IS NOT AVAILABLE THEN MEDICAID PROVIDER NUMBER IS DISPLAYED  
 "Total RX" is an aggregate number which includes multiple NDC's for the listed product. These NDC's have multiple dosages and each one has a varying reimbursement per unit level. Individual claims can vary based upon the quantity the physician prescribed (i.e. days' supply). Due to each of these variables the average per script per provider will vary.

Charles Duarte  
Administrator  
Division of Health Care Financing and Policy  
1100 E. William Street, Suite 101  
Carson City, Nevada 89701

Dear Mr. Duarte:

On May 27, 2010, your state provided my office with data regarding the top ten prescribers of several pain management and mental health drugs in your state. These types of drugs have addictive properties, and the potential for fraud and abuse by prescribers and patients is extremely high. Mental health drugs continue to be prescribed at astounding rates and pain management clinics are turning into a hotbed for black market painkillers. When these drugs are prescribed to Medicaid patients, it is the American people who pay the price for over-prescription, abuse, and fraud.

After an extensive review of prescribing habits of the serial prescribers of pain and mental health drugs in Nevada, I have concerns about the oversight and enforcement of Medicaid abuse in your state. While I am sensitive to the concerns of misinterpretation of the data you provided, the numbers themselves are quite shocking.

For example in 2009, the records for three prescribers illustrate my concerns. Prescriber 1376764779 wrote 752 scripts for Xanax, 594 for Roxicodone, and 78 for OxyContin. Prescriber 1801092002 wrote 524 scripts for Xanax, 380 for Geodon, 317 for Seroquel, and 1312 for Abilify. Prescriber 1235189705 wrote 512 scripts for Geodon, 841 for Zyprexa, 581 for Seroquel, 480 for Abilify, and 1282 for Risperdal, which was 553 more than the second highest prescriber for the drug. In almost all instances, one of

these prescribers was always the top prescriber or in the top three for all of the listed drugs.

It is my intention to ensure that each of the states is adequately monitoring, investigating, and stopping fraud and over-prescription of these types of drugs. Therefore, please provide answers to the following questions:

1. What action, if any, has your agency taken with respect to the prescribers identified to the Committee?
2. If there has been no action taken with respect to these prescribers, please explain why not.
3. Please identify which of the providers identified to the Committee remain eligible to bill the Medicaid Program.
4. Please provide the 2010 and 2011 numbers for the top prescribers of these same drugs.
5. Has each of these prescribers been cross-checked for complaints or misconduct with the state medical board or the National Practitioner Data Bank? If not, do you plan to do so?
6. Have any of the prescribers identified to this Committee been referred to your state medical board?
7. Is there any system set up in your state to identify and monitor excessive prescription writing? If not, why not?
8. Have you received any training or guidance from the Centers for Medicare and Medicaid Studies to help identify potential issues with prescription drugs?
9. Does your state maintain a database of all prescribed controlled-substances? If so, what entities have access to it?
10. Does your state have any point-of-sale restrictions related to maximum units, prior authorization, therapeutic duplication, or early refill? If not, why not?
11. Were any of these top ten prescribers identified in the federal-mandated Drug Utilization Review or CMS-base retrospective reviews?
12. Does your state have any programs in place to educate providers about the prescription of antipsychotics to children and adolescents?

Thank you in advance for your cooperation and attention in this matter. When responding to this letter, please number your answers in accordance with my questions. I would appreciate a response by February 13, 2012. If you have any questions, please do not hesitate to contact Erika Smith of my staff at (202) 224-5225.

Sincerely,

A handwritten signature in blue ink that reads "Chuck Grassley". The signature is written in a cursive, slightly slanted style.

Administrator

February 10, 2012

The Honorable Charles E. Grassley  
Ranking Member  
United States Senate  
Committee on the Judiciary  
Washington, DC 20510-6275

Dear Senator Grassley:

This letter is in response to your correspondence dated January 23, 2012 in which you indicated you had concerns regarding the oversight and enforcement of Medicaid abuse in Nevada. In your letter you asked several questions to which I offer the following responses:

1. What action, if any has your agency taken with respect to the prescribers identified to the Committee?

*Answer: These providers, along with others that were identified as possible over prescribers have been referred to the Board of Medical Examiners.*

2. If there has been no action taken with respect to these prescribers, please explain why not.

*Answer: N/A*

3. Please identify which of the providers identified to the Committee remain eligible to bill the Medicaid Program.

*Answer: All three prescribers are active and eligible Medicaid providers.*

4. Please provide the 2010 and 2011 numbers for the top prescribers of these same drugs.

*Answer: The reports for 2010 and 2011 are attached. However, again I must caution that use of the data outside the appropriate context could lead to erroneous accusations of inappropriate utilization. This report has no safeguards to ensure it does not result in inappropriate conclusions.*

5. Has each of these prescribers been cross-checked for complaints or misconduct with the state medical board or the National Practitioner Data Bank? If not, do you plan to do so?

*Answer: The Board of Medical Examiners has not taken any formal disciplinary actions against the three prescribers noted in the letter. Information regarding complaints that have been received by the Board is not available to the public per Nevada Revised Statutes, therefore, complaint information is not available.*

6. Have any of the prescribers identified to this Committee been referred to your state medical board?

*Answer: Yes, the State Medicaid Agency has referred the prescribers to the State Medical Board.*

7. Is there any system set up in your state to identify and monitor excessive prescription writing? If no, why not?

*Answer: Yes, the Nevada State Board of Pharmacy has in statute a Prescription Monitoring Program which requires all pharmacies to report nightly, all controlled substances in the State. In addition, the Board of Pharmacy has a Controlled Substance Task Force which is in collaboration with metropolitan police departments. Nevada Medicaid utilizes the information that is reported to the Board of Pharmacy to assist in our lock-in procedures. Medicaid is also a representative on this Task Force to continue our inter-agencies collaboration. Both prescribers and pharmacies have access to the data through the State Board of Pharmacy.*

8. Have you received any training or guidance from the Centers for Medicare and Medicaid Studies to help identify potential issues with prescription drugs?

*Answer: One staff member attended the "Emerging Trends in Medicaid" training at the Medicaid Integrity Institute in Columbia, South Carolina last September(2011) and during this training there was a 75 minute presentation on "Hot Topics in Pharmacy". No additional training or guidance has been received.*

9. Does your state maintain a database of all prescribed controlled-substances? If so, what entities have access to it?

*Answer: Yes, please reference question #7. Nevada Medicaid does have access to data within the databases for purposes of fraud and excessive utilization of controlled substances.*

10. Does your state have any point-of-sale restrictions related to maximum units, prior authorization, therapeutic duplication, or early refill? If not, why not?

*Answer: Yes, Nevada Medicaid's Point-of-Sale (POS) system has extensive edits on quantity edits, prior authorization, therapeutic duplication, and early refill.*

- The controlled substance refill tolerance limit is set at 90% while all other drugs are at 80%.*
- Long-acting narcotics require prior authorization and have quantity limitations.*
- Duragesic® (fentanyl transdermal) patches require prior authorization and have quantity limitations.*
- Fentanyl Citrate Buccal tablet and Lozenge (Fentora® and Actiq®) require prior authorization and have quantity limitations.*
- Narcotic/Acetaminophen combinations have quantity limitations.*

- *Toradol® (ketoralac tromethamine) tablets have prior authorization and quantity limitations.*
- *Suboxone® (buprenorphine/naloxone) and Subtex® (Buprenorphine) require prior authorization, has quantity limitations, and prescriber limitations.*
- *Psychotropic medications require prior authorization for all children under the age of 18.*
- *All other limitations can be found in Chapter 1200 of the Medicaid Services Manual <https://dhcfp.nv.gov/MSM/CH1200/Ch%201200%20Final%208-23-11.pdf>.*
- *The POS system has therapeutic-duplication edits programmed based upon the Medi-span drug dictionary. The DUR Board chose to hard edit deny on severity level one edits. Attachment "ProDUR Exceptions" is the top 20 exceptions the POS system edited against in 2010 and their corresponding intervention. Nevada Medicaid converted from First Data Bank drug dictionary to MediSpan on December 2, 2010 with our new POS system.*
- *Nevada Medicaid manages a lock-in program where recipients who have been identified due to excessive utilization are locked-into a unique pharmacy. Referrals into Medicaid may be accepted anonymously. Utilization is reviewed based upon pharmacy claims, medical claims and data provided through the State Board of Pharmacy Prescription Monitoring Program. Referrals may be made to the Controlled Substance Task Force for prescribers and recipients as warranted.*

11. Were any of these top ten prescribers identified in the federal-mandated Drug Utilization Review or CMS-base retrospective reviews?

*Answer: Throughout 2011 Nevada Medicaid focused their retrospective reviews predominately on controlled substances. The following list is a breakout of the month and target intervention that was lettered to physicians for either controlled substances or antipsychotics. The names of the physicians that were lettered are not readily available. Attachment "Retro DUR Interventions" is a Summary of the number of profiles that were lettered in retro-reviewed and the specific therapeutic First Data Bank reason code for the letter.*

- *January 2010*
  - *Polypharmacy letters*
- *April 2010*
  - *Carisoprodol may have the potential for abuse*
  - *Use of  $\geq 2$  overlapping segments of short-acting narcotics with short-acting narcotics*
- *June 2010*
  - *Oxycodone dose > 180 mg/day*
  - *Bupropion interaction w/Non-phenothiazine Antipsychotics*

- *Tramadol with SSRIs or SNRIs*
- *Use of  $\geq 2$  overlapping segments of short-acting narcotics with short-acting narcotics*
- *Atypical antipsychotics duplication with atypical antipsychotics*
- *September 2010*
  - *Carisoprodol interacts with benzodiazepines*
  - *Benzodiazepines dupe with Benzodiazepines*
  - *Risperidone duplication with atypical antipsychotics*
- *November 2010*
  - *Atypical antipsychotics caution in patients with diabetes*
- *February 2011*
  - *Use of  $\geq 2$  overlapping segments of short-acting narcotics with short-acting narcotics*
  - *Skeletal muscle relaxants duplication with skeletal muscle relaxants*

12. Does your state have any programs in place to educate providers about the prescription of antipsychotics to children and adolescents?

*Answer: The State of Nevada, Division of Child and Family Services in collaboration with Medicaid, recently applied for a grant through the Centers of Health Care Strategies, to assist for promising practices including education and outreach for the utilization of psychotropic medication with children and adolescents.*

As previously stated, Nevada is willing to assist in continuing your effort to deter fraud and abuse in the Medicaid Program. However, again we request that any identified prescribers have the due process to represent the medical judgment utilized in the prescribing patterns. If you have any comments, questions, or concerns please do not hesitate to contact me directly at (775) 684-3677.

Sincerely,

Charles Duarte  
Administrator
